## RYNVELD'S GOLD MEDAL BULBS

(FOR THE WHOLESALE TRADE)

We do not issue a retail catalog and cannot fill retail orders

New York City

Yaphank, N. Y.

Central Park, N. Y.

Jacksonville, Fla.

San Francisco, Cal.

We take pleasure in presenting herewith our catalog and price list for our many customers and prospective customers. It has been our desire in preparing this catalog to list such items as are in demand by the Florists and Seed Stores and we present below the reasons why we are better equipped to handle these orders than ever before.

### TERMS

5% off for cash with order.

2% off for payment within 10 days after receipt of merchandise.

All bills payable net 60 days.

Unless credit is established with us please give references and allow us sufficient time for checking.

All quotations herein are for shipment F. O. B. New York. Prices slightly higher on the Pacific Coast.

For the convenience of our Southern customers we can make shipment of Florida grown stock direct from growing station at Jacksonville, Fla.

Cases and packing extra at cost.

Prices quoted herein are subject in all cases to maintenance of present tariff schedule on the respective item and any change made therein before delivery automatically cancels the within quoted prices.

### Display Cards for Your Counter Trade

To those who retail bulbs we offer free of charge display card reproductions in natural colors. It is important that you have these as they are of considerable assistance in increasing sales and obtaining new customers.

### SERVICE

We maintain offices and warehouses at New York and California and carry a complete line of fall bulbs in stock for our customers requirements.

Wire orders are filled the same day as received by us. All others within 48 hours of receipt. Your inquiries are welcomed and we are pleased to make suggestions as to culture or selection when requested.

We have a representative in your territory. Let us have him call on you.

149-155 West 24th St., N. Y. C.

F. RYNVELD & SONS, INC.

San Francisco, Calif.

### PRICES

Allow us to sound a word of warning to those who contemplate placing orders based upon competitive quotations. During a period of declining prices such as we have had recently, competition has developed into a frenzy of price cutting with the inevitable result that quality is sacrificed for the sake of price. Skimping on price when purchasing bulbs invariably results in depreciated returns at blooming time.

We maintain that **quality for quality** our prices are lower than those quoted by others not interested in maintaining the high standard which we have set up.

### SQUARE DEAL

To those who have dealt with us for years we need not repeat our policy of square dealing. To our new customers we desire to say that at all times we are anxious to adjust differences. Occasionally, mistakes occur and we receive requests for adjustments. Many are not our fault but our policy of "a square deal for the Florist" will not allow us to overlook them.

### WE GUARANTEE

That all bulbs leave our farm or warehouse in good condition, packed in boxes sufficiently strong and substantially secure to insure delivery in good order but we do not assume risks in transit.

That all stock is true to name as represented.

That all stock is inspected and found to be sound and free from disease when shipped.

### WE DO NOT GUARANTEE

Productivity—The actual growing of flowers is subject to many conditions over which we exercise no control. We allow five days after delivery for inspection by the purchaser and cannot entertain complaints made after the expiration of this period.

All requests for adjustments must be made in writing to our main office at 149 West 24th Street, New York City and we assume no liability for those made verbally to our salesmen or in any other way.

## RYNVELD'S DUTCH HYACINTHS

Our Hyacinth fields are located in those sections of Holland noted for producing the finest quality. Our extensive acreage with many of the fields devoted exclusively to varieties that are favorites with Florists, enables us to serve our customers with the cream of Holland's Hyacinths. Prices vary according to the size of the bulbs, of course, the large bulbs produce bigger and finer spikes with more individual florets. Our list consists of varieties which have proven to have the greatest merit. Not all varieties will bloom at the same time, we have therefore indicated the relative time of blooming (a) the earliest to (d) the latest.

### WHITE AND BLUSH

**Arentine Arendsen**, snow white early forcer, large bells. (a)  
**L'INNOCENCE**, pure white, excellent forcer, most popular. (a)

## BREEDER TULIPS

For sometime the dark, deep colors of the Breeder Tulips were neglected in favor of the brighter tones of the Darwin and Cottage Tulips. The last few years have seen keen revival of these beautiful Tulips, however, and a subsequent demand that should not be overlooked. Their odd, artistic colors, make a special appeal to American garden lovers.

The use of Breeder Tulips has steadily increased and we expect an unusual demand for these this year, and have prepared our stocks accordingly.

### CROCUS—(Choice Bulbs)

One of the earliest flowers to bloom in the Spring, making an effective show when planted in masses in the Rock Garden, lawn or border. They are perfectly hardy and can be left in the ground undisturbed. In order to grow Crocus in a room or greenhouse, the pots or bowls in which they have been planted should be kept outdoors in the ground or in a cool place indoors until the middle of January; a warm temperature before that time will spoil them, after January 15th a temperature of 50 degrees to 55 degrees will bring them into bloom in a few weeks.

## RYNVELD'S SUPERIOR PAPER WHITES

For many years Rynveld's Jacksonville grown Paperwhites have proved the finest available in this country. Climatic conditions in Jacksonville equal those of Southern France, producing flowers standing well above the foliage. An unusually good growing season, most up to date equipment, and a thorough knowledge in the growing and curing of these bulbs are the responsible factors for **Superior Paperwhites**. The value of these bulbs is well known to the florist trade; at present prices they represent an opportunity for a quick and profitable turnover. They are flowered readily in from four to six weeks.

For water culture in the home they are becoming more popular every year, and for this purpose are being retailed by many kinds of merchants all over the Country. Can be brought into bloom from November to April, by planting bulbs weekly.

## LILY OF THE VALLEY—BLEEDING HEARTS—TRITOMAS

Experienced "Lily of the Valley" forcers are far more interested in quality than in price. We offer only the very best strains for forcing, knowing well that our customers desire the best, even though the price may be slightly higher than for inferior quality. Our large Valley importation yearly, is conclusive evidence that we are supplying the stock that makes money for our customers. We operate our own packing warehouses, and every Pip that we send out is carefully inspected by our own men.

# LILY OF THE VALLEY—BLEEDING HEARTS—TRITOMAS

## LILY-OF-THE-VALLEY (for outdoor planting))

We import for this purpose a special grade ideal for naturalizing. The Pips are large, and will bloom profusely. We do not recommend these for forcing however. We have built up a big business on these, and last season again we were compelled to refuse many late orders.

Box of 500.....	17.00
Box of 1000.....	30.00

## LUBECK BRAND

This is the well-known **Top of the Market Brand**, the finest Valley grown. Produces more and larger bells than any other type. Strong wiry stems. For specialists in Valley growing this is the only correct Pip.

Cases of 250.....	\$12.00
Cases of 500.....	22.00
Cases of 1000.....	40.00

## NEWPORT BRAND

The finest stock for Fall and Christmas forcing. Place your order now for delivery each week, it will pay to have a constant supply on hand. Planted in bowls, with bulb fibre make ideal gifts.

Cases of 250.....	\$10.50
Cases of 500.....	19.00
Cases of 1000.....	36.00

## DIELYTRA SPECTABILIS (Bleeding Hearts)

Unusually fine as an early Spring pot plant, especially for St. Valentine's Day. It is perfectly hardy and makes a splendid showing in the Perennial border or when planted with early bulb stock. Every florist should have some of these in bloom in combination with other pot plants.

## TRITOMA—"Red Hot Poker" or "Flame Flower"

For Summer and Fall blooming. Torch like spikes of bloom, and grassy foliage make them conspicuous objects in any garden. Profitably grown for cutflowers, once planted they increase in beauty each season and require but little attention.

**Pfitzeri**—A prolific bloomer during the late Summer and early Fall. Rich orange-scarlet flowers, very effective.

## IRISES—ANEMONES—RANUNCULUS

Everyone knows the value of these beautiful bulbous Irises. The flowers are not only superior in substance, brilliancy and purity of color, but also earlier and larger than the old Spanish Iris. These Irises are unsurpassed as cutflowers; they will stand any amount of handling.

Florists have found them very profitable for greenhouse forcing, bringing in good returns in the market. The bulbs we offer are produced at our Long Island farms, grown under cool weather conditions and free from the mosaic diseases.

## ANEMONES

### ANEMONE (Windflower)

Decidedly popular leading market flowers. Florists who force them are amply repaid. Color effects are unsurpassable. A prolonged marketing season can be obtained by planting successive batches. For best results bulbs should be started in sand well moistened and transplanted in about a week's time. We recommend the 1 year old bulbs, as these will give the best flowering results. For outdoor planting bulbs should be in the ground not later than the first part of April, in well drained soil, and will then bloom during the summer.

## RANUNCULUS

The Giant French Ranunculus resembles in form a miniature pompon Dahlia, but are as brilliant and varied in coloring as the Poppies and Anemones. The flowers are extremely double, almost globular. In forcing or for outside planting, give them the same treatment as Anemones, but they do not mature quite as early.

**Tecolote Giants. Mixed.** By far the largest and most magnificent strain of Ranunculus. Flowers are very double, blended with giant semi-double. Colors of orange, red, yellow, pink, in fact every desired color is included in this assortment.

## GIANT FLOWERING AMARYLLIS

In our constant effort to seek out such bulbous items as seem to offer the greatest promise of commercial value, we have recently undertaken the extensive culture and development of a special strain of Amaryllis and now have, at our Florida farm, the most outstanding collection ever grown in this Country.

Few flowers rival the Amaryllis in grandeur, range of color, or simplicity of culture, and it remains only for the bulbs to be available in large quantities to put them among our most popular bulbous flowers. The stock that we are growing is a selection of the finest range of colors produced by renowned specialists all over the world.

**AMARYLLIS CULTURE**—Amaryllis bulbs are ready for delivery early in November, but we do not recommend planting them until the latter of January when the flower buds will be showing. Plant in five or six inch pots and water sparingly until root growth develops. After flowering, the bulbs maintain active growth and about the middle of October watering must cease and the bulbs dried off by laying the pots on their sides under a greenhouse bench or in a dry cellar. Early in February the bulbs will show new flower stems and the pots should then be watered and brought into the light, a temperature of 50 degrees is best at the start, and this can be increased to 60 degrees as the flower stems develop. Applications of weak manure twice a week at this stage will strengthen the plants and increase size of flower. Slightly larger pots will be necessary as the bulbs develop size.

### AMARYLLIS HALLII (Lycoris Squamageri)

A hardy Amaryllis. Produces attractive green foliage early in Spring, foliage later dying down and about a month thereafter flower stalks appear, growing about 3 feet high with an umbel of large Lily shaped delicate pink flowers shaded with clear blue.

Very valuable for outdoor planting. Flower stalk well placed above the foliage. Flowers pure white.

Per Hundred .....	\$10.00
Per Thousand .....	\$90.00

## EUCCHARIS AMAZONICA (Amazon Lily)

Eucharis are among the most desirable greenhouse bulbous plants, very beautiful and free flowering. Pots should be well drained, as the bulbs require much water during flowering period. A temperature of 65 degrees to 70 degrees is best. By drying off the bulbs to some extent for a few weeks, a crop of flowers may be had at almost any season. They should not be dried to such a degree that all the foliage is lost, else the bulbs will be much weakened. The bulbs bear from two to three flowers on a stem.
